

FASTER & REPRODUCIBLE
VESSEL CAPPING
FOR BETTER WORKFLOW

| SIMPLIFYING VESSEL CAPPING

Handling a large number of digestion vessels impacts lab workflow and operator time. By improving this step, your lab can achieve a fast and reliable digestion process with lower operator time. The easyCAP, suitable for MAXI-44 or MAXI-24 High Performance (HP) rotors, offers greater productivity and performance for high-volume laboratories.

HIGHER PRODUCTIVITY

GREATER DIGESTION RELIABILITY

ERGONOMIC

COMPACT & AFFORDABLE

COMPATIBLE WITH MAXI ROTORS

AUTOMATE YOUR VESSEL HANDLING FOR HIGHER PRODUCTIVITY

| HIGHER PRODUCTIVITY

The sample preparation throughput for elemental analysis is influenced by several factors: handling time, heating time and number of samples processed simultaneously. Milestone's easyCAP improves the handling of the digestion vessels, so that your lab is more efficient, and your operators have more time for other tasks.

| GREATER RELIABILITY

Digestion quality and reproducibility relies on using the digestion vessel at its best. The easyCAP ensures the proper closure of each vessel, regardless of the operator, and to achieve consistent and reliable digestions, run after run.

| ERGONOMIC

The operator time related to manual operation directly increases with the number of vessels. The easyCAP not only reduces the handling time, but it also makes the closure of MAXI-44 and MAXI-24 HP vessels more convenient for the operator's routine.

| COMPACT & AFFORDABLE

The easyCAP, with its minimum footprint and light weight, can be easily installed under any fume hood, and be ready for use in a few seconds. Investing in the easyCAP allows you to gain operator's time and enhance efficiency of your workflow.
